

The Latest in Custom Steel,
and Fiberglass Entry Systems

Doors Built Right.

About us

The Dorplex Story:

For the last 30 years Dorplex has grown to a point where we are now one of the leading manufacturers of Custom Steel and Fiberglass Entry Systems in North America. Our facilities, in Toronto Ontario, has the latest in automated equipment, from a fully robotic paint line, a "state-of-the-art" slab machining line and automated equipment all along the assembly process. Nothing is left to chance, when your new door arrives, it will be perfect in every way. Production and engineering are only one part of the equation when it comes to manufacturing a Custom Door System.

Our super dedicated "Customer Support Team" makes sure what you ordered is what you get. From Order Entry to product procurement to production control, shipping, billing and after sales service, nothing is left to chance.

Our main goal is to make sure you get what you ordered, on time, made with the highest quality materials available, assembled and finished with passion and pride.

Create the Entryway of Your Dreams

It's as easy as **1, 2, 3,**

STEP

1

Choose a configuration, door style and door material

Entry doors come in all shapes and sizes. Whether it's a single door or a complicated system with a transom, we will make it fit beautifully.

Choose from our variety of configuration options and door styles to match your architectural style and design aesthetic.

STEEL

FIBERGLASS

See our full range of the door styles

Steel Door styles pg. 6

Executive Door styles pg. 5

Fiberglass Door styles pgs. 8-9

High-Performance Steel — Durable, secure and long-lasting

Dorplex uses a Premium 24 Gauge Steel Slab that is Factory Prefinished (WHITE) by our supplier and does not need further finishing. There is a 16" LOCK-BLOCK on all doors that will accommodate almost all hardware styles and the door is filled with a Polyurethane Foam Insulation that will keep your home warm in the winter and cool in the summer.

Fiberglass — Engineered to last a lifetime

Get the ultimate in performance and appearance with fiberglass doors. These doors won't dent, crack, split or warp. In addition, they provide five times the insulation value of a wood door. Choose from dozens of Dorplex decorative glass or wrought iron inserts to further enhance your door, or enjoy the simplicity of a traditional paneled door. Choose from Smooth, or Grained Oak and Grained Mahogany textures.

STEP

2

Select your glass design or decorative insert

Enhance your door with further customization. Choose from our variety of crafted decorative glass, wrought iron, and executive panel inserts that will add to your own uniquely designed entranceway.

See our full range of the decorative inserts

Decorative Glass Collection pgs. 13-24

Wrought Iron Collection pgs. 26-28

Executive Panel Collection pg. 5

STEP

3

Choose your colour or stain finish

Select one of our beautiful 43 Designer Paint Colours, or one of our 8 rich detailed stains.

NOTE: Colours and textures displayed in this brochure are as true to life as can be reproduced in print. May vary from actual product.

STEP 1 It all starts here Make an entrance...

Choose a configuration and door style

Take a closer look at our beautiful door collections. Further customize your door by adding decorative glass and wrought iron inserts, coming options, designer colour and stain options, and coordinating sidelites and transoms. **Create the entrance of your dreams.**

EXE104/EXE098
Shown with additional sidelites.

EXECUTIVE DOOR COLLECTION

The exclusive look of a high definition, raised panel, without losing energy efficiency.

Executive Panels are glazed into the door much like decorative door lites. They have a full steel panel that is surrounded by a raised, distinctive and elegant perimeter frame. When you choose to add Executive Panels to your new door system the result is a rich and elegant look that will set you apart from the ordinary.

Add glass from our Legacy Collection and you now have the "WOW" door you always wanted. See pages 13-24

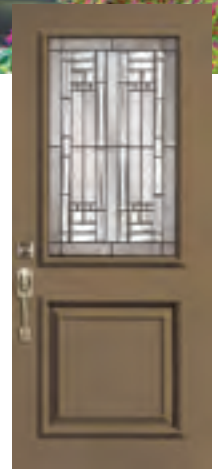

See page 33 for Paint Options.

SMOOTH FIBERGLASS DOOR STYLES AT A GLANCE

SMOOTH FIBERGLASS door panels have all the benefits of a WOOD GRAIN Fiberglass door, but offer a clean, contemporary look to any entry system. A smooth surface and highly defined panel embossments combined with one of Dorplex's 43 designer colors create a magical entry system for any home. Smooth Fiberglass doors are engineered to last a lifetime without giving up the benefits of a Fiberglass Door.

SDL | SIMULATED DIVIDED LITES COLLECTION

In years gone by most windows did not usually consist of a single pane glass, but rather several small rectangular glass pieces held together with wood dividing bars. Dorplex is proud to introduce the look of the old with the technology of today.

The Dorplex SDL COLLECTION is a simple solution to bring the “look of the past”. A single lite, door insert with applied PVC extrusions that simulate individual panes of glass. The PVC extrusion, smooth or wood grain applied to the inside and outside surfaces of the glass using a VHB (Very High Bond) tape in the pattern of your choice. SDL bars are finished to match the door colour in and out.

There is an internal grill between the glass that gives the impression of individual glass units. SDL bars are available in 1 1/4” widths.

- **Thermal Performance:**
The single pane of glass offers improved NFRC and U-factor insulating ratings for better performance values compared to multiple, joined panes.
- **Sightlines:**
SDL doorlites provide crisp clean lines, with precision machined joints. The PVC surrounding frame matches the colonial look of the SDL bars.

WROUGHT IRON COLLECTION

Our Wrought Iron Collection celebrates originality and the splendour of wrought iron

Unique to this collection is our Sandblast Cutout glass backing, reflecting both the beauty of our glass design and the strength of wrought iron. This feature showcases the brilliance of the wrought iron design through both sides of the glass insert.

INTERIOR GLASS OPTIONS

The Wrought Iron Collection offers a variety of glass backing options on all its wrought iron designs. Choose from either clear glass, sandblast cut out, chinchilla, cathedral, listral, or molten.

GARDEN DOOR COLLECTION

Garden Doors are a perfect alternative to Sliding Patio Doors. Standard Garden Doors are sized to replace most Sliding Doors without structural changes. Door panels are hinged either on the frame or the center post for a variety of entry locations and interior furniture placement.

The Garden Door Collection is available in 2 panel, 3 panel and 4 panel models. The standard height is 79 5/8" but Garden Doors can also be made with 79" standard door slabs for a height of 82 1/4" or 81 5/8".

Three and four panel systems available. A mounted interior screen is available with the outswing systems.

HARDWARE

Some hardware restrictions apply to 5' systems. Glass will be offset to accommodate standard drilling.

PATIO DOOR DIMENSIONS

SIZE (WIDTH)	ACTUAL DIMENSIONS
5'0".....	59-3/8" X 79-5/8"
6'0".....	71-3/8" X 79-5/8"
7'6".....	88-1/4" X 79-5/8"
9'0".....	106-1/8" X 79-5/8"

SWINGING PATIO DOOR OPENING OPTIONS

2. RIGHT

3. LEFT

4. RIGHT

5. LEFT

6. RIGHT

Standard Garden Doors are built as follows: One door is fixed and the other opens inwards as viewed from the EXTERIOR. The door that opens is hinged on the centre. For ordering purposes, customers need to specify their preference for the 1. Left or 2. Right opening door as seen in the sketches above.

Other options are available:

A) One door fixed, with 3. Left or 4. Right door opening, hinged on the side as seen in sketches above.

B) Both doors hinged on the sides with one door, 5. Left or 6. Right, designated as the most commonly opened door as in the sketches above.

- Three and four-panel systems are also available.
- Outswing Systems are available (note: screen will be mounted on the inside)

SCREEN OPTIONS:

- Standard rolling screen
 - "Hide-Away" screen system is optional
- Some restrictions apply.*

REPLACEMENT DOORS

DIY Quick & Easy to Install

Replacement Doors are available in a wide selection of colours and sizes and can accommodate almost any glass design.

Simple and easy to install...

Just remove the old door, trim and threshold, slip in the new replacement door and secure it in place. There is no need to remove or replace the existing door jamb, saving you time and effort.

This is especially helpful if you are replacing a door in an older home where the door jamb is especially difficult to remove.

How to measure for your REPLACEMENT DOOR

Follow these easy steps to ensure the best fit for your Replacement Door.

Measuring your door and determining your door handing is very important to ensure the best fit for your opening. For best results follow this easy guide.

STEP 1. Measure edge-to-edge from one side of the door slab to the edge of the other side of the door slab **(A)**.

STEP 2. Measure the top edge of the door slab to the bottom edge of the door slab. **Do not include the sweep on the bottom of the door (B).**

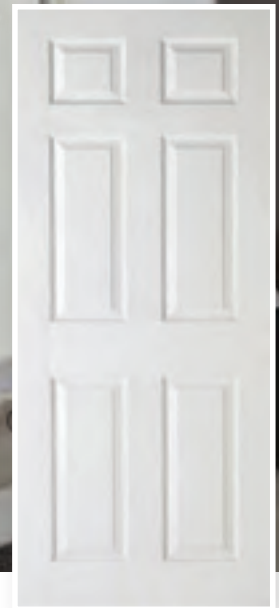

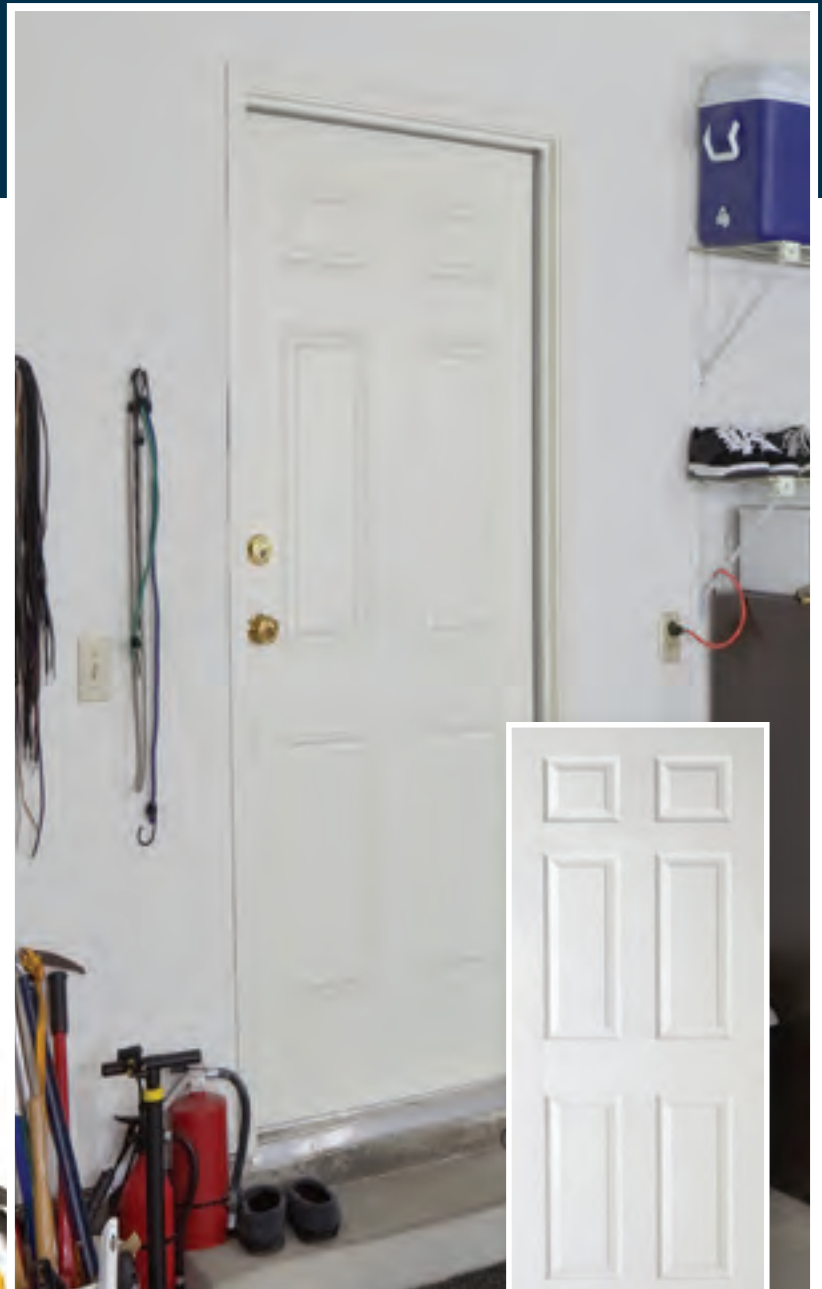

Replacement Doors are available in a wide selection of colours and sizes and can accommodate almost any glass design.

WDITH (MIN. TO MAX.)	HEIGHT (MIN. TO MAX.)	REPLACEMENT DOOR REQUIRED
29 1/2" x 30 1/2"	80" x 80 1/2"	30" x 80"

Every Component Counts

Only premium quality components are used in all entry door systems.

24 GAUGE STEEL SLAB

Dorplex uses a premium 24 gauge steel slab that is factory pre-finished to resist rusting. The slab styles are made from pine finger jointed pressure treated prefinished wood. The wood styles have no knots. The lock block is 16 inches which will accommodate almost all hardware. The door slab is filled with a polyurethane insulation that will keep your home warm in the winter and cool in the summer. We offer a huge variety of door lights that will compliment every taste and style. Our door lite cutting machine accurately cuts the door light opening to ensure the glass fits perfectly into the opening.

STEEL

FIBERGLASS

PINE FINGER JOINTED DOOR FRAME

Your quality door system begins with the best quality wood available. We only use pine finger jointed wood with no knots. Our wood is all Canadian home grown lumber.

BRICKMOLD

Our brickmold is very aesthetically pleasing and comes in 1 5/8" and 2 1/8" to meet your measurement requirements. Available in Double Bead style (standard) or New Contemporary style.

DOUBLE BEAD
WOOD OR LAMINATE

CONTEMPORARY
LAMINATE ONLY

LAMINATED VINYL CLADDING

The industry has been using vinyl cladding for years. Dorplex has developed a laminated vinyl cladding system that is glued to the wood substrate. This product is a far superior product. It will not buckle or warp under intense heat which is a major concern with your typical vinyl cladding. The wrap is also applied to the inside of the jamb allowing the customer to have a finished system that does not require painting after the install. Our jamb preparation is all done by automated machinery to ensure a precise cut.

VINYL CLAD

LAMINATED VINYL

Our hinge routing machines are calibrated daily to guarantee the correct hinge location of the jamb.

All jamb material is tested on our bow tester. This machine uses laser technology to determine the bow in a given piece of wood. If the bow exceeds tolerance levels the jamb material is not used in production.

BALL BEARING HINGES

The hinge is the only hardware that fastens the door to its post. Dorplex uses premium ball bearing hinges to allow the door to move more freely through the entranceway. The hinge is fastened to the post using a thick 8 gauge hinge reinforcement plate. This prevents the door from un-squaring itself away from the post. We also offer decorative hinges that will enhance the interior of your entranceway.

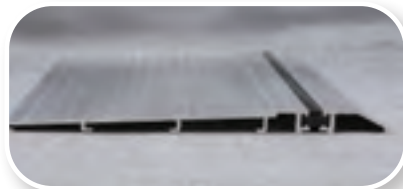

STEEL GUARDIAN PLATE

All our systems come with an 8 gauge steel guardian plate that is fastened to the outside of the door frame. The hardware latch and strike plate are fastened to this plate to reinforce the lock block section of the door. This provides added peace of mind and reduces the occurrence of break-ins.

SILL OPTIONS

There are sill options to meet your desired application. Our sills come with a thick aluminum extrusion and a wood sub-sill. This strong sill gives your door system the base strength required to support the door and glass components. Black anodized sills and wheel chair accessible sills are also available. The sill is a one piece sill that is cut to measure. We have different thermal break options. These range from a pour and bridge thermal break to a vinyl cap application. Our outswing systems are built with a special outswing sill that prevents moisture from entering the home.

DURABLE DOOR SWEEP

The door sweep sits at the bottom of the door and lines up with the sill. Our durable door sweep is made with 10 fins to stop cold, wind and rain from entering your home. The sweep has a vinyl cap on the inside to hide the screws used to fasten the sweep to the door. We use mohair fins which do not freeze or tear.

DOOR LIGHT FRAME

The door light frame will hold the decorative light in place in your door system. Our frame is made of a strong foam PVC material that resists warping. It is made of a non-yellowing material and comes with a screw cap cover to hide the fastening screws. The frame is sealed with three co-extruded seals that do not require sealant which tends to ooze out when heated.

DORPLEX STANDARD PVC FRAMES

Screw cap cover excluded on round shapes and clear lites.

CONTEMPORARY PVC FRAME - OPTIONAL

WEATHER STRIPPING

The weather stripping is inserted into the door post to prevent air infiltration. Dorplex uses a premium Z-Mag or extended weather stripping system that embraces both magnetic and compression technology for a far superior seal. We also offer compression weather stripping. These are both available in white and black.

PAINTED DOORS

We offer 43 paint colours to choose from. Our paint is a premium paint that contains a heat reflective pigment that will reduce the surface temperature of the door. Our paint is applied using techniques perfected by the automotive industry. We use robots to apply an exclusively formulated primer. Another robot then applies one of the 43 Dorplex colours. The automated process guarantees a consistent quality finish that carries a five year warranty against fading or blistering. If you choose to have your door painted we will provide you with a touch up bottle to repair minor scratches. See page 33 for Paint Options.

STAINING

We provide customers with 8 stain colour options. The stain process is highly intricate. It is all done by hand in our staining facility. The end result is a beautiful stain that will match any wood door finish. When you choose a factory stained fiberglass door you will get a door that looks like wood at a fraction of the wood door price. Get the ultimate in performance and appearance with fiberglass doors. These doors won't dent, crack, split or warp. The rails and styles which surround the entire circumference of these doors are four inches of strong laminated veneer lumber. Your door is reinforced from top to bottom. Just like a wood door. See pages 32 for Staining Options.

PREMIUM COMPONENTS — Performance You Can Count On

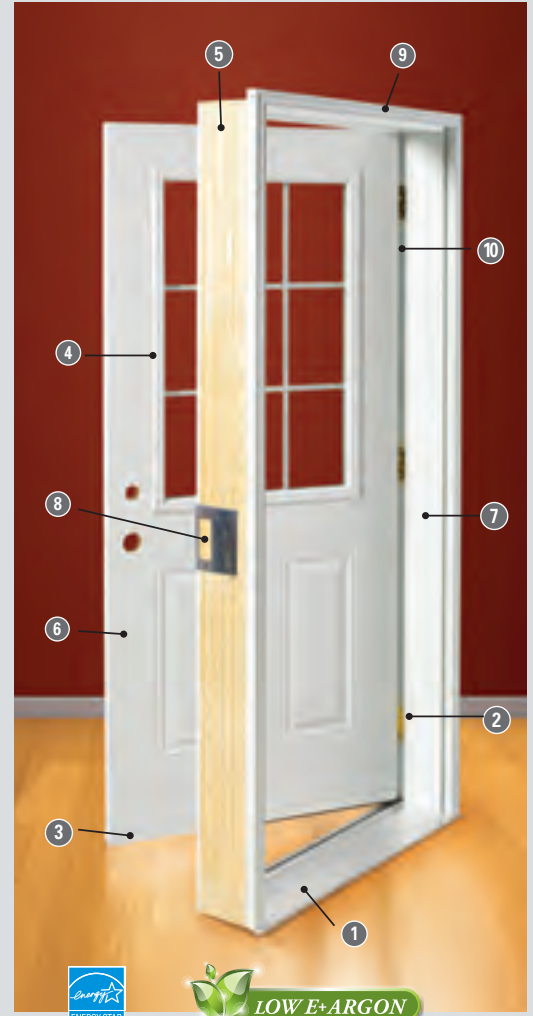

We're committed to building better doors that protect one of your greatest investments — your home.
